

NEW FRENCH PATENT APPLICATIONS

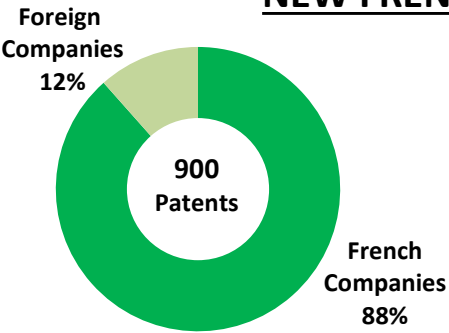

Main Technology Areas	
1	Lighting devices for vehicles
2	Suppression of vibrations
3	Cosmetics

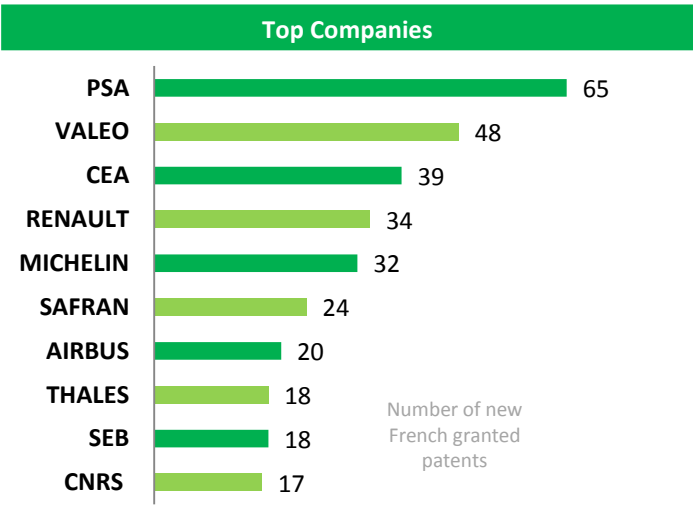

Main Technology Areas by Companies	
	Elements for body-finishing, identifying, or decorating
	Lighting devices or systems specially adapted for vehicles
	Arrangements for connecting or disconnecting semiconductor
	Preventing or minimising internal leakage of working-fluid
	Cleaning of vehicles
	Investigating or analysing materials by specific methods
	Cosmonautic vehicles
	Tyres characterised by the chemical composition / physical arrangement
	De-icing or preventing icing on exterior surfaces of aircraft
	Alarms responsive to a single specified undesired operating condition

NEW FRENCH GRANTED PATENTS

Main Technology Areas	
1	Heating, cooling or ventilating devices for vehicles
2	Seats specially adapted for vehicles
3	Cosmetics

Main Technology Areas by Companies	
	Seats specially adapted for vehicles
	Heating, cooling or ventilating devices for vehicles
	Measuring X-radiation, gamma radiation, or cosmic radiation
	Seats specially adapted for vehicles
	Tyre tread bands; Tread patterns; Anti-skid inserts
	Stators
	Landing gears
	Traffic control systems for aircraft
	Parts, details or accessories of cooking-vessels
	Arrangements for testing electric properties
