### How the wireless communication players are getting ready for the 5G?

The telecommunications revolution of the early 21st century has led to the development and proliferation of more and more communications devices. Recent estimates have shown that there are almost 10 mobile or cellular handsets for every person on earth. One consequence of such phenomenal growth in handset proliferation is the concomitant demand for data and has led to the need to use more of the radio spectrum. Indeed, from 4 bands in the 2000's, we now use more than 30 bands and this number will keep increasing with the upcoming 5G. To manage all these bands, RF modules for mobile handsets have been widely developed in order to fulfil the increasing requirements.

Today we are at the first step of 5G networks that will become a RF communication standard in 2020. RF front end modules (RF FEM) are among the key components for 5G applications and their market will be highly impacted by the new standard. Indeed, according to Yole Développement, the RF FEM market will reach \$22,7 M by 2022 showing a CAGR of 14%.

RF FEM players face numerous challenges that goes from device performances to packaging. Indeed, the increase number of data bands and data types result in a increasing module size, complexity and cost. Understanding the patented technologies and players' IP strategies give a serious advantage to detect business opportunities, identify emerging solutions and anticipate competitor's positions.

The RF FEM patent monitoring service allows you to take advantage of a monthly-updated Excel file and benefit from both quarterly analysis reports and direct interaction with our analysts.

The monthly Excel files include new patents, patents expired/abandoned, patent transfers (re-assignment, licensing) and patent litigation/opposition. This useful Excel patent database allows for multi-criteria searches including priority date, patent assignees, claims and legal status of patents.

The quarterly reports provide the IP trends over the three last months, with a close look to key IP players and key patented technologies.

The direct access to our analysts offers you Q&A session and open discussion on specific patented technologies or company IP portfolios.
