### Microfluidics is a well-established growing market with successful applications in several industrial areas

Microfluidics emerged in the beginning of the 1980s and is used for example in the development of inkjet printheads, DNA chips, lab-on-a-chip technology, or point-of-care devices. It is a multidisciplinary field at the intersection of engineering, physics, chemistry, biochemistry, nanotechnology, and biotechnology.

In this broad technical area, **more than 30,000 patent families related to microfluidics have been published worldwide, and over 150 new patent families are published each month.** A lot of large companies, such as HP, BOSCH, ABBOTT or ROCHE, are very active in terms of IP activity in this field, and every month new startups file new patent applications.

Moreover, several market predictions indicate a robust growth for the next coming decades. A demand for microfluidic technology exists worldwide with North America (> 40%) being the largest market followed by Europe (> 30%) and Asia Pacific (~20%).

Therefore, in such a fast-growing and dynamic microfluidic market, it is essential to **track patents** in order to **anticipate changes**, quickly **detect new entrants and business opportunities**, **mitigate risks**, and make **strategic decisions**.

The **microfluidic devices patent monitoring service** allows you to take advantage of a **monthly updated Excel file** and benefit from both **quarterly analysis reports** and **direct interaction with our analysts**.

The **monthly Excel files** include **new patents**, patents **expired/abandoned**, **patent transfers** (re-assignment, licensing) and **patent litigation/opposition**. The patents are categorized by application segments such as PoC, single cell processing, fluid control, drug screening, cooling devices, inkjet etc. This **useful Excel patent database** allows for multi-criteria searches including priority date, patent assignees, claims, legal status of patents and technology segments.

The **quarterly reports** provide the IP trends over the three last months, with a close look to key IP players and key patented technologies.

The **direct access to our analysts** offers you Q&A session and open discussion on specific patented technologies or company IP portfolios.
